

# BINYAM TAMIRU

MERN STACK DEVELOPER · FULL-STACK ENGINEER

+251 984 109 945 | binyam374@gmail.com | Bahir Dar, Ethiopia (Open to remote & relocation)  
github.com/bin-yam21 | t.me/Binii\_123

## PROFILE

MERN Stack Developer and 2026 graduate of Bahir Dar University (BSc in Software Engineering, CGPA 3.76/4.00), specializing in building full-stack web applications with MongoDB, Express, React, and Node.js. Comfortable owning a product end to end: React/Next.js interfaces, REST APIs, database design, and deployment with Docker. Also works with Go for backend services and Rust for systems-level, high-performance projects, broadening how I approach architecture and performance. A self-directed, hands-on learner who builds real projects to master new technology.

## SKILLS

### MERN & Frontend

MongoDB, Express, React, Node.js, Next.js, TypeScript / JavaScript, Redux / Zustand, React Query, Tailwind CSS

### Also Works With

Go (Golang) — REST services & concurrency, Rust — Axum & WebSockets, Python, LangChain

### Backend & APIs

REST APIs, NestJS, Fastify, TypeORM, PostgreSQL, Redis, MinIO, Authentication & RBAC

### Tools & Practices

Docker & CI/CD, Git & GitHub, Linux, Postman, AI Agents & MCP Servers

## EXPERIENCE

### Full Stack Developer — TapServe (Tibeb Technology PLC)

Dec 2025 – Jun 2026

- Built core features for TapServe, an all-in-one POS and inventory management platform for restaurants and cafés, including QR-code table ordering and a live kitchen display workflow.
- Worked across the full stack in React/Next.js and Node.js, from the customer-facing ordering UI to real-time POS and kitchen-display updates.

### Full Stack Developer (Part-Time) — Demket Technologies

Dec 2024 – Dec 2025

- Built dashboards, Telegram Mini Apps, and bot integrations using Next.js, Zustand, and React Query, consuming REST endpoints and real-time event streams.
- Delivered interactive systems with clean architecture and clear separation between API, state, and UI layers.

### Frontend / Full Stack Developer — Two Z Software PLC

Jun 2025 – Oct 2025

- Developed modern web applications in React and TypeScript, integrating and debugging backend APIs end to end.
- Improved performance and maintainability through refactoring and typed API contracts.

### Software Engineering Intern / Developer — INSA — Information Network Security Administration

Mar 2025 – Jun 2025

- Contributed to backend services for secure, scalable, and reliable systems, focusing on API development and system design.
- Applied security-aware practices across authentication, validation, and access control.

## PROJECTS

### SecureHR | React · TypeScript · LoopBack 4 · PostgreSQL

Full-featured HR management system for security companies, handling employee lifecycle, scheduling, payroll, and compliance workflows, with role-based access control.

### Berana Book Store | React · Express · Node.js · MongoDB

Full-stack MERN e-commerce bookstore with authentication, product management, and order processing for a seamless shopping experience.

### Thrift-Store Backend API | Go · PostgreSQL · REST · Docker

Backend API for a thrift-store marketplace, using Go's concurrency model for background tasks and a layered handler → service → repository architecture. — Rust Chat App: real-time WebSocket chat built to explore Rust's concurrency and memory safety.

## EDUCATION

### BSc in Software Engineering

2022 – Jun 2026

Bahir Dar University · CGPA: 3.76 / 4.00 | Languages: English — Fluent, Amharic — Native
